

Make fluid analysis part of your maintenance program

Fluid analysis helps you reduce downtime, lower repair costs, increase drain intervals, and save money. It keeps you up-to-date on the condition of all your machine's major components and helps you make smart decisions on machine maintenance before and after your Standard and Extended Coverages expire.

John Deere requires fluid analysis on most construction and forestry machines with new Extended Coverage warranty contracts or extensions.

Ask your dealer about the model and warranty coverage associated with oil sampling.
